EDUCATION

MVGR College Of Engineering, Vizianagaram, AP
Gayatri Junior College, Srikakulam
Amara Jyothi School, Pathapatnam

B.Tech in Computer Science | GPA: 8.49
Higher Secondary Education | %: 97.3
Secondary Education | %: 96.17

Expected, 2027
May, 2023
Aug 2021

EXPERIENCE

Software Engineer Intern | SmartBridge

May 2025 - July 2025

- Developed **ShopSmart**, a digital grocery shopping platform that enables users to browse products, manage carts, and place orders through an intuitive online interface.
- Designed and implemented core features including user authentication, product management, shopping cart, order processing, and responsive user experience.
- Integrated frontend and backend modules to ensure seamless communication, efficient data management, and secure application functionality.
- React.js / Node.js / Express.js / MongoDB / GitHub

ML Prediction

Dec 2025 - Jan 2026

- I carried out this project under the guidance of Dr. K. Sandeep Saradhi, focusing on developing an AI-powered platform for climate-based stock market prediction and analysis.
- This project is all about predicting the impact of regional climate conditions on India's energy sector stock market using AI and machine learning while providing real-time insights for informed investment decisions.
- It provides AI-powered stock predictions, real-time analytics, and intelligent insights to support data-driven investment decisions.
- ML Algorithms (Random Forest Classifier, XGBoost Regressor)

Embedded Systems Projects | Arduino IDE

Dec 2024 - Jan 2025

- Developed a Rain Detection System using sensors and Arduino to automatically detect rainfall and generate alerts.
- Designed a Dot Matrix Display using MAX7219 to display scrolling messages and custom animations.
- Built an LCD 16x2 interfacing project to display sensor readings and system status in real time.
- Arduino IDE / Rain Sensor Module / LCD 16x2 Display / Jumper Wires / Breadboard

TECHNICAL SKILLS

Languages : Python, Java, SQL, JavaScript, C++, C.

Development Tools : Git, Github, Linux.

Web Tools : HTML, CSS, ReactJs, ExpressJs, NodeJs.

Relevant Coursework : DSA, OOPS, DBMS, OS, CN.

Frameworks : React Native.

Database: MySQL, MongoDB, PSQL.

PROJECTS

Jalrakshak Water Guardian 🔄 | Python, HTML, CSS, JS, C++

December, 2025

- Designed an IoT-based water management solution to support efficient monitoring of rural water supply systems and provides real-time visibility, automated alerts, and predictive insights to improve water quality, resource management and operational efficiency.

College Time Table Management System 🔄 | HTML, CSS, JavaScript

September, 2024

- Designed a centralized timetable management system to simplify academic scheduling for educational institutions.
- Enables administrators, faculty, and students to efficiently create, manage, view, and export timetables while reducing manual effort.

Restaurant & Hotel Suite App 🔄 | React Native, NodeJs, PSQL.

June, 2026

- Developed a centralized hotel and restaurant management system to streamline daily operations across multiple departments.
- Enables efficient management of bookings, orders, staff, payments, and customer services through role-based dashboards with real-time updates.

KEY SKILLS

- Time Management.
- Communication Skills.
- Team Work.
- Leadership Qualities.
